Examination: Histopathological examination

Internal invoice No.

Cost of diagnostic procedure

Examination No.:

Patient: XXX

PESEL: XXX

Age:

Gender: F

Material: Total organ resection – left breast

Unit in charge:

Physician in charge:

Material collected on: (

Material received on: (

Expected time of examination: up to 8 working days

Clinical diagnosis: Bifocal cancer of the left breast. Simple mastectomy.

100-0-3

Carcinoma, infiltrating duct, NOS 85009

Site: breast, NOS 050.9

for 4/13/11

Examination performed on:

Results of immunohistochemical examination:

Focus marked as R1:

Estrogen receptors found in over 75% of neoplastic cell nuclei.

Progesterone receptors found in 10-75% of neoplastic cell nuclei.

HER2 protein stained using rabbit antibody Ventana PATHWAY HER-2/neu (4B5). Negative reaction in invasive cancerous cells (Score = 1+)

Focus marked as R2:

Estrogen receptors found in over 75% of neoplastic cell nuclei.

Progesterone receptors found in 10-75% of neoplastic cell nuclei.

HER2 protein stained using rabbit antibody Ventana PATHWAY HER-2/neu (4B5). Negative reaction in invasive cancerous cells (Score = 1+)

Compliance valid.

Examination performed on:

Macroscopic description:

Carcinoma ductale bifocale - NHG2 (3 + 2+1:0 mitoses/ 10 HPF, visual area diameter: 0,55 mm).

Carcinoma ductale in situ (DCIS) within the tumours (solid and cribrate type with high nuclear atypia, and point and comedo necrosis, 10% of the tumour areas).

Invasio carcinomatosa vasorum.

In situ lesion of the type cancerisatio lobulorum.

Mamilla sine laesionibus.

Glandular tissue showing parenchymal atrophy.
