

ICD-0-3

Carcinoma, infiltrating ductal, NOS 8500/3

Site: Breast, NOS C50.9 1/19/11 JW

Diagnosis:

Poorly differentiated invasive ductal carcinoma with focal intraductal spread (maximum microscopic tumor diameter: 1.5 cm; distance from nearest resection margin less than 0.1 cm) with multiple ulcerations of the skin.

Diagnosis:

1. Ablated breast sample with a further focus of poorly differentiated invasive ductal carcinoma (tumor diameter: 1.5 cm; distance from dorsal margin 0.8 cm and from nearest lateral resection margin 1 cm, other margins remain free).

Concluding tumor classification: NOS, G III, pT1c(m)pN0(0/13)L0V0R0.
