ICD-0-3

Carcinoma, infiltrating lobular, nos 8520/3
Site: breast, nos C50.9

for 4/24/11

Final Diagnosis

Breast, right, excision: Invasive lobular carcinoma, Nottingham II (of III), forming a 2.8 x 2.6 x 2 cm mass (AJCCpt2). No lymphovascular involvement or carcinoma in situ component is identified. The surgical resection margins, after one re-excision are negative for tumor. The uninvolved breast tissue shows duct ectasia and stromal fibrosis.

Lymph node, right axilla, sentinel, excision: A single right sentinel lymph node is negative for tumor.

Lymph nodes, right axilla, excision: Multiple (3) right axillary lymph nodes are negative for tumor.

Staining for estrogen and progesterone receptors is positive.
